Summary

Artificial Intelligence master's student and Computer Science graduate at the University of Verona, specialized in machine learning, deep learning, computer vision and natural language processing, with a strong portfolio of hands-on AI projects. Backed by solid software-engineering and full-stack foundations, I build practical, data-driven AI systems end to end, from the model to the interface. Motivated, curious and eager to grow within an AI / machine-learning engineering team.

Education

University of Verona Verona, Italy
M.Sc. in Artificial Intelligence *2024 – Present*

- Focused on machine learning, deep learning, computer vision and natural language processing, combining strong theoretical foundations with hands-on AI projects. *Final grade: in progress.*

University of Verona Verona, Italy
B.Sc. in Computer Science *2020 – 2024*

- *Thesis:* "Development of a web app for monitoring IP uptime and security."

Experience

Full Stack Developer 2023 – 2024
BSQ *Verona, Italy*

- Designed and developed, end to end, a secure web application to monitor the uptime and security of IP devices (Bachelor's thesis), working independently across the full stack.
- Built asynchronous network scanning with Celery and Nmap (open-port detection, OS fingerprinting, security checks) with immediate threat notifications.
- Developed an interactive dashboard with map geolocation, real-time up/down monitors and a searchable device table.
- Implemented secure authentication, role-based permissions (user/admin) and multi-language support, backed by a MySQL database.
- Stack: Python, Flask, Django, Celery, Nmap, MySQL, HTML, CSS, JavaScript, Bootstrap.

Barman Jun 2022 – Sep 2022
Compass Group *Verona, Italy*

- Customer service in a fast-paced environment; strengthened communication, teamwork and time management.

Technical Skills

AI / ML: PyTorch, scikit-learn, Hugging Face Transformers, Computer Vision, Deep Learning, NLP, Reinforcement Learning, Explainable AI

Languages: Python, Java, C, JavaScript, Swift, MATLAB

Web: Flask, Django, HTML, CSS, Bootstrap

Data & Tools: MySQL, pandas, NumPy, Celery, Nmap, Git/GitHub, LaTeX

Spoken: Albanian (Native), Italian (C1), English (B2)

Projects

Bone Fracture Detection with Explainable AI *Python, PyTorch*
ResNet18 X-ray classifier whose Grad-CAM attention aligns with radiologists' annotations, with a YOLOv8 + classifier pipeline reaching 93% accuracy.

Visual Question Answering (VQA) *Python, PyTorch, Transformers*
Multimodal models that answer natural-language questions about images, comparing 8 vision–language architectures (CLIP, ResNet, BERT, LSTM).

Neuro-Symbolic Safe Driving *Python, RL*
Reinforcement-learning agents (DQN, PPO) made safer with traffic rules in temporal logic, cutting crashes from 35% to 5% in an unseen simulator.

Lifelong Action Learning *Python, PyTorch*
Video action recognizer (CNN + LSTM) on UCF101 that learns new actions over time without forgetting, using replay, distillation and MAML meta-learning.

MACURA Drone Racing *Python, MuJoCo*
Trained a simulated drone to race through a 3-D windy course, comparing model-based reinforcement-learning methods (MACURA, MBPO, M2AC, SAC).

Fitness Activity Recognition *Python, scikit-learn*
End-to-end ML pipeline classifying six gym exercises from accelerometer/gyroscope data; best model (Random Forest) reached 98.3% accuracy.

CongruentClosureDAG *Java*
DAG-based congruence-closure algorithm for the satisfiability of equality formulas with arrays, lists and uninterpreted functions, plus a graphical visualizer.

More projects: explore the full AI & software portfolio on github.com/silvergjeka22.

Awards & Training

CyberChallenge.IT 2026 Italy
National cybersecurity training program *2026*

- Selected through a national competitive program covering network security, web application security, cryptography and ethical hacking.

Open Badges: iOS Development with Swift; Problem Solving & Soft Skills (University of Verona, 2022).

I authorize the processing of my personal data contained in this CV in accordance with EU Regulation 2016/679 (GDPR) and Italian Legislative Decree 196/2003.
